

# **100 CONTRACTORS RECEIVING THE LARGEST DOLLAR VOLUME OF PRIME CONTRACT AWARDS FOR RESEARCH, DEVELOPMENT, TEST, AND EVALUATION**

**FISCAL YEAR 2001**

---

## **FOREWORD**

*100 Contractors Receiving the Largest Dollar Volume of Prime Contract Awards for Research, Development, Test, and Evaluation (RDT&E)* is published annually. This report provides information on the 100 contractors that received the largest dollar volume in Department of Defense prime contract awards as reported on DD Form 350 (Individual Contracting Action Report).

## **INTRODUCTION**

This report presents summary data on the 100 prime contractors receiving the largest dollar volume in Department of Defense (DoD) awards for research, development, test, and evaluation (RDT&E) work during fiscal year (FY) 2001. RDT&E work can include research (basic and applied) and development (exploratory, advanced, engineering, operational systems, or management and support services). Full definitions for each of these categories are provided in Section 235.001 of the Defense Federal Acquisition Regulation Supplement.

These data rank each corporation according to its relative standing. The order of ranking is based on the net value of each contractor's RDT&E awards. Since FY 1994, the contractors have been ranked by the parent company vs. subsidiaries or divisions of the company. For example, figures for General Motors Corporation include awards to Hughes Aircraft Company. Also, classification of a company as foreign is based on the parent company. Since FY 1996, only the top 100 contractors are listed in this publication.

When percentages are used for dollar amounts they are based on whole dollars. The categories are business firm (B), foreign contractor (F), educational (E) and miscellaneous other, including nonprofit institutions (O).

## **NOTES ON COVERAGE**

The dollar amounts shown here include prime contract awards for RDT&E work only. Data on awards for other services, such as training, and on any supplies furnished by the contractors in support of research being done are excluded. The locations shown in the table are the places where the work was to be performed. Normally, this is a facility of the concern awarded the contract. However, if the work was to be performed at a Defense facility, such as an Air Force base, the location shown may be that of the Defense agency rather than the contractor.
